

The City of Alexandria, Virginia Selects Geographic Technologies Group (GTG) to Implement GIS Software Solutions

Goldsboro, NC - Geographic Technologies Group, Inc. (GTG) announced today that the **City of Alexandria, Virginia** has procured software and services from GTG. The City procured additional licenses of GTG's LGmobile to expand the City's existing LG platform and purchased an upgrade of LGmobile and LGdispatch to LGcommunity connect.

LGmobile is the latest breakthrough in mobile software solutions. LGmobile is a field-based mobile GIS mapping software solution used in public safety vehicles. It has a simple, easy-to-use interface that allows users to access important and vital dispatch and GIS information. Active incidents, AVL units and specific user events are all readily available within LGmobile.

LGcommunity connect is a GIS software solution that allows both HTE Land and Public Safety users to integrate AVL with LG software. The software allows GPS enabled vehicles to be tracked via the GIS interface. It takes GPS data from vehicles and places a moving map symbol on the GIS map interface that corresponds to the vehicles location in the real world. Historical AVL information is maintained with the product.

Curtis Hinton, CEO and Co-owner of GTG, stated, "We are excited to continue to work with the City of Alexandria. We have worked side-by-side with Alexandria staff to provide the latest and most productive GIS Public Safety tools on the market. This latest push for mobile computing and AVL will enable the City's Public Safety staff with information that will allow them to do their job better, quicker, and safer."

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains six offices located across the United States: Headquarters in North Carolina, and Regional Offices in Florida, Illinois, Oregon, Pennsylvania and Texas.
