The Village of Bolingbrook, Illinois Selects Geographic Technologies Group (GTG) to Implement GIS Software Solutions

Longview, TX – Geographic Technologies Group, Inc. (GTG) announced today that the **Village of Bolingbrook, Illinois** has procured software and services from GTG. The City purchased an additional licenses of LGdispatch with community connect.

LGdispatch with community connect is a GIS software solution that allows both HTE Public Safety Computer Aided Dispatch users to integrate AVL (Automatic Vehicle Locations) with LG mapping software. The software allows GPS enabled vehicles, incoming 911 calls, and Phase II calls to be tracked via the GIS interface. It takes GPS data from vehicles and places a moving map symbol on the GIS map interface that corresponds to the vehicles location in the real world. Historical AVL and CAD information is maintained with the product.

James Kelt, GTG's Regional Manager, stated, "The Village of Bolingbrook has been in the process of rolling out the latest in Public Safety GIS applications for dispatch and crime analysis mapping by leveraging the LG product line. Once the tools were installed and configured, agency officials and dispatchers realized that the software needed to be in the hands of more employees. These additional licenses will put the full functionality and data available in LGdispatch in the hands of more users for the Police Department."

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains six offices located across the United States: Headquarters in North Carolina, and Regional Offices in Florida, Illinois, Oregon, Pennsylvania and Texas.
