## **The City of Broken Arrow, Oklahoma Selects Geographic Technologies Group (GTG) to Implement GIS Software Solutions**

**Longview, TX** – Geographic Technologies Group, Inc. (GTG) announced today that the **City of Broken Arrow, Oklahoma** has procured products from GTG's LG GIS software suite. The City will be implementing LGfires as well as five workstations to better serve the City.

LGfires is a simple, easy-to-use GIS software product seamlessly integrated to Broken Arrow's existing fire incident data. It offers the fire departments refined spatial tools required in today's high-tech world. LGfires allows an end-user to generate plumes to predict hazardous material impact areas. The user can pick from a variety of atmospheric conditions, wind direction/speed and emission rates to create a hazard zone.

James Kelt, Regional Manager for GTG, stated, "The City of Broken Arrow, Oklahoma is implementing the latest in Fire RMS mapping applications with LGfires. This tool will give fire officials at the City the ability to graphically represent locations of fire incidents as it corresponds to GIS data. This powerful yet simple to use tool represents the City's fire incident location in a whole new light and ultimately will allow fire officials to allocate resources, increase fire prevention and reduce response times for their City."

### **About Geographic Technologies Group, Inc. (GTG):**

*GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.*

*GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains six offices located across the United States: Headquarters in North Carolina, and Regional Offices in Florida, Illinois, Oregon, Pennsylvania and Texas.*
