## Understanding Local Government

1.888.757.4222 www.geotg.com

### **The City of Burleson, Texas Selects Geographic Technologies Group (GTG) to Implement GIS Software Solutions**

**Longview, TX** – Geographic Technologies Group, Inc. (GTG) announced today that the **City of Burleson, Texas** has procured software and services from GTG. The City purchased additional licenses of LGmobile and LGdispatch community connect, LGcrimes, LGweb, and LGaddress manager.

LGweb is a dynamic and powerful Web-based application for local government which provides functionality such as online mapping, advanced querying capabilities, viewing of GIS Data, report generation, printing, exporting and geographic analysis. Employees from managers to field crew will be able to visualize GIS data in conjunction with billing, consumption, work order, utilities, permitting and other data residing in City wide databases.

LGdispatch, LGcrimes, Geomanger and LGmobile are affordable and easy-to-use mapping and analysis software applications designed for towns, cities and counties of all sizes and complexities. These applications add in the visualization and analysis of police incident and computer aided dispatch information.

LGcommunity connect is a GIS software solution that allows both HTE Land and Public Safety users to integrate AVL with LG software. The software allows GPS enabled vehicles to be tracked via the GIS interface. It leverages GPS data from vehicles and places a moving map symbol on the GIS interface that corresponds to the vehicles location in the real world. Historical AVL information is maintained with the product.

James Kelt, GTG's Regional Manager and director of GTG's Texas office says, "The City of Burleson is now prepared to take their current GIS initiatives to the entire enterprise. The acquisition of LG tools will give every City department the ability to do their jobs more effectively and efficiently. A true return on investment in GIS, public safety, and land management databases are realized when these tools are deployed. This seamless and powerful tool set will empower the City's departmental users with the ability to geographically represent the information most critical to their needs."

#### **About Geographic Technologies Group, Inc. (GTG):**

*GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.*

*GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains six offices located across the United States: Headquarters in North Carolina, and Regional Offices in Florida, Illinois, Oregon, Pennsylvania and Texas.*
