Colleton County, South Carolina Selects Geographic Technologies Group (GTG) to Implement New GIS Software Solutions

Goldsboro, NC – Geographic Technologies Group, Inc. (GTG) announced today that **Colleton County, South Carolina** has procured new products from GTG's LG GIS software suite. The County will be implementing licenses of LGdispatch and LGaddress for Public Safety.

LGaddress for Public Safety is a Bi-directional Geographic Information System (GIS) software application that allows spatial management of Colleton County's E-911 Geofile. LGaddress for Public Safety allows the user to update Geofile records with spatial information residing in a GIS. Spatial overlay capabilities allow the user a window into GIS and Geofile records.

LGdispatch is a Computer Aided Dispatch (CAD) mapping interface that provides E-911 dispatchers with an interactive map displaying the location of all emergency calls. LGdispatch offers advanced geocoding capabilities. Addresses can be validated against address points, polygons (tax parcels) and lines (road network).

Curtis Hinton, CEO and Co-owner of GTG, stated, "We are very excited about the opportunity of working with Colleton County. Their implementation of LG tools shows that they are serious about making sure their public safety implementation is advanced and provides the citizens the best possible solution."

The County's utilization of GTG's LG products highlights the value of our products as an integrated and comprehensive set of GIS solutions that leverage the County's investment in their current applications. As with other fast-growing communities, Colleton County has embraced cutting-edge technology to improve public safety services for its citizens.

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains six offices located across the United States: Headquarters in North Carolina, and Regional Offices in Florida, Illinois, Oregon, Pennsylvania and Texas.
