## **The City of Columbia, Missouri Selects Geographic Technologies Group (GTG) to Implement New GIS Software Solution**

**Longview, TX** – Geographic Technologies Group, Inc. (GTG) announced today that the **City of Columbia, Missouri** has procured LGViewer from GTG's LG GIS software suite.

LGviewer provides a set of GIS tools in a simple to use desktop application. LGviewer allows for visualization of land management information. Local government professionals have long desired the ability to map and analyze the spatial distribution of all data that is tracked within their data storage. The land management module allows users to assign locations to each land management record. The LGviewer software is designed to leverage database data along with existing GIS data to provide a powerful set of tools for visualization and analysis.

James Kelt, Regional Manager for GTG, stated that, "LGviewer is one of the most existing GIS applications for local government on the market. This simple to use yet powerful application puts GIS in the hands of departmental users. LGviewer is specifically designed to plot locations such as code enforcement violations, building permits, utility meters, accounts receivable, occupational licenses, work orders, and planning and zoning cases. By incorporating data from these databases with reporting, queries, printing, and extraction tools, LGviewer will take the City of Columbia's GIS and database initiatives to the next level."

### **About Geographic Technologies Group, Inc. (GTG):**

*GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.*

*GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains six offices located across the United States: Headquarters in North Carolina, and Regional Offices in Florida, Illinois, Oregon, Pennsylvania and Texas.*
