The City of Coral Springs, Fla. Selects GTG to Implement GIS Software Solutions

GOLDSBORO, N.C. – Geographic Technologies Group, Inc. (GTG) announces that the City of Coral Springs, Fla. has procured multiple licenses of LG Mobile Community Connect and LG Route. These software applications will allow the City to serve the community more effectively and efficiently.

LG Mobile Community Connect is a GIS software solution that allows LG users to integrate AVL with the LG Mobile software. LG Mobile allows officers in the field to view critical GIS and 911 call data. The software allows GPS enabled vehicles to be tracked via the GIS interface. It takes GPS data from vehicles and places a moving map symbol on the GIS map interface that corresponds to the vehicles location in the real world. Historical AVL information is maintained with the product.

LG Route is the latest in intuitive routing software, providing a state-of-the-art solution perfect for any local government organization. LG Route offers exciting routing functionality such as finding the most efficient travel route, generating travel directions, finding the closest facility, or defining service areas based on travel time. It can also save a designated route for future use

“We are excited about the continued opportunity of working with Coral Springs,” said Curt Hinton, CEO of GTG. “GTG has worked with the city for many years and is continually impressed with the professionalism of their staff. Their continued focus on innovative tools for public safety illustrates their priorities. They are focused on saving time, lives, and money with GIS technology.”

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has more than 700 clients located throughout North America and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains three offices located across the United States: Headquarters in North Carolina, and Regional Offices in Texas and Florida.
