

The City of Danville, Virginia Selects Geographic Technologies Group (GTG) to Extend Their Crime Analysis Capabilities

Goldsboro, NC – Geographic Technologies Group, Inc. (GTG) announced today that the **City of Danville, Virginia** has procured additional products from GTG's LG GIS software suite. The City will be implementing additional licenses of LGcrimes software to expand the City's existing LG platform which includes other GIS applications such as LGdispatch.

LGcrimes is an affordable and easy-to-use crime reporting, mapping and analysis software application designed for towns, cities and counties of all sizes and complexities. LGcrimes aids in the visualization and analysis of police incident information. The spatial distribution of crimes will allow law enforcement professionals to maximize the use of departmental assets to satisfy the ever-growing demand for critical services. Public Safety departments with limited budgets and staff can now take advantage of crime analysis technology while leveraging their organization's investment in GIS technology.

Curtis Hinton, CEO and Co-owner of GTG, stated that, "GTG has worked side by side with Danville to improve upon the crime analysis capabilities of LGcrimes. Front line staff in Danville have been instrumental in providing visionary ideas on how to improve and better utilize the LGcrimes product. The tool is instrumental in the daily public safety decisions in Danville."

The City's continued utilization of GTG's LG products highlights the value of our products as an integrated and comprehensive set of GIS solutions that leverage the City's investment in their current applications. As with other fast-growing communities, the City of Danville has embraced cutting-edge technology to improve public safety services for its citizens.

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions.
