

The City of Danville, Virginia Selects Geographic Technologies Group (GTG) to Implement New GIS Software Solutions

Goldsboro, NC – Geographic Technologies Group, Inc. (GTG) announced today that the City of Danville, Virginia has procured additional product functionality from GTG's LG GIS software suite. The City will be implementing additional licenses of LGcrimes software to expand the City's existing LG platform.

LGcrimes is an affordable and easy-to-use crime reporting, mapping and analysis software application designed for towns, cities and counties of all sizes and complexities. LGcrimes aids in the visualization and analysis of police incident information. Public Safety departments with limited budgets and staff can now take advantage of crime analysis technology while leveraging their organization's investment in GIS technology.

Curtis Hinton, CEO and Co-owner of GTG, stated that, "GTG has been working with Danville since the mid-1990s. We are excited about Danville's continued leadership in Virginia in regards to comprehensive GIS solutions. Inez Pollok, GIS Coordinator, and Kerry Goode, IT Director, have long understood that the true power of GIS is its ability to add value to each department's existing IT investment. So many organizations enter data into disparate systems with little return on investment. Danville's primary focus is ROI and is a national leader in this regard."

The City's continued utilization of GTG's LG products highlights the value of our products as an integrated and comprehensive set of GIS solutions that leverage the City's investment in their current applications. As with other fast-growing communities, the City of Danville has embraced cutting-edge technology to improve public safety services for its citizens.

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions.
