

## **The City of Fort Pierce, Florida Selects Geographic Technologies Group (GTG) to Implement GIS Software Solutions**

**Goldsboro, NC** – Geographic Technologies Group, Inc. (GTG) announced today that the City of Fort Pierce, Florida has procured software and services from GTG. The City of Fort Pierce has procured licenses of LGviewer.

LGviewer is a visualization and analysis tool that allows a user to drill down into GIS data layers and disparate corporate databases. LGviewer was developed over time with insight gained from visiting over 400 local governments and utilities nationwide. These organizations needed a tool set that was focused on their specific needs that was able to leverage their existing IT investments. The tool had to be easy-to-use yet powerful. Many organizations had GIS tools that had too much functionality and thus the end user never used the tools. LGviewer is perfectly scaled and designed for the end user.

Curtis Hinton, CEO and Co-owner of GTG, stated that, "Fort Pierce is experiencing rapid growth and the need for innovative IT solutions. Majorie Gaskin, IT Director for Fort Pierce, understands the need for tools focused on integration. Her vision for GIS at Fort Pierce revolves around ease-of-use while harnessing the City's current IT investments. We at GTG are excited about working with the City and look forward to helping Fort Pierce keep pace with the ever growing need for comprehensive IT solutions."

### **About Geographic Technologies Group, Inc. (GTG):**

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains six offices located across the United States: Headquarters in North Carolina, and Regional Offices in Florida, Illinois, Oregon, Pennsylvania and Texas.
