FOR IMMEDIATE RELEASE

GTG Designs, Develops, and Deploys an Enterprise GIS Solution for the Town of Wilton, CT

GOLDSBORO, N.C. – Geographic Technologies Group® (GTG®) was contracted by the **Town of Wilton, Connecticut** to design, develop, and deploy an Esri enterprise GIS solution. GTG compiled and reviewed existing GIS data and developed a comprehensive database design to best suit the Town's GIS needs. GTG then deployed the Esri ArcGIS Server and ArcSDE enterprise GIS solutions. The Town's existing ArcGIS desktops were then upgraded to Version 10 to be compatible with the new server environment. Town staff were trained how to access the newly designed geodatabase and how to perform basic administration of the server environment.

Consolidation of the Town's GIS data into a comprehensive geodatabase design will improve data maintenance, access, and performance. Additionally, the deployment of ArcGIS Server will allow the Town more opportunities to integrate the GIS environment with other enterprise systems.

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has more than 700 clients located throughout North America and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains four offices located across the United States: Headquarters in North Carolina, and regional offices in Texas, Florida, and Ohio.
