

GTG's Free Webinars Empower Local Governments

Goldsboro, N.C. – Geographic Technologies Group, Inc. (GTG), a leading GIS solutions provider, is helping local government organizations realize the full potential of their GIS. GTG is now offering free webinars featuring the new enterprise software suite, GeoBlade.

The webinars are designed to provide users with all the tools needed to maximize the impact that the software has in an organization. GTG also offers free LG webinars for HTE users. These specialized webinars support GTG's LG GeoBlade software. Webinar attendees can choose to participate in either private or group webinars.

GeoBlade is an ArcGIS Server-based enterprise software suite. It is equipped with a core viewer and the ability to incorporate additional plug-ins, called "blades." Blades are additional functionalities specific to an agency's departmental needs. The toolset is highly customizable, and its user-friendly interface makes working with GIS a reality for all local government professionals.

"Our webinars are designed for users to make the most of their GIS experience," said Curt Hinton, CEO of GTG. "Many times, users aren't aware of all of the capabilities an application has to offer. We want local governments to realize the full potential of their GIS."

To register for a free GeoBlade webinar, visit www.geotg.com/webinars.

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains three offices located across the United States: Headquarters in North Carolina, and Regional Offices in Texas and Florida.
