Geographic Technologies Group Announces Release of GeoBlade Dispatch

Goldsboro, N.C. – Geographic Technologies Group, Inc. (GTG) announces the release of GeoBlade Dispatch, a mapping interface that provides E-911 dispatchers with an interactive map displaying the location of emergency calls. GeoBlade Dispatch is ESRI compliant and operates with ArcGIS Server and pre-ArcGIS Server technologies.

GeoBlade Dispatch is highly customizable and allows dispatchers to enter special events to display on the screen. The application has the ability to perform historic call mapping, historic AVL mapping, and E-911 call mapping. GeoBlade Dispatch is AVL enabled and Phase II compliant.

GeoBlade Dispatch is one of many department-specific “blades” incorporated into the GeoBlade software suite. Blades are additional functionalities to the core viewer, specific to an agency’s departmental needs.

“GeoBlade Dispatch is the next generation of technology available to assist E-911 dispatchers,” said Curt Hinton, CEO of GTG. “With its address matching capabilities and live display of call locations, this application offers a return on investment that is second to none. GeoBlade Dispatch will improve the quality of customer service, saving time and lives in the process.”

For more information on the GeoBlade software suite, visit www.geotg.com/geoblade.html or call 888-757-4222.

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains three offices located across the United States: Headquarters in North Carolina, and Regional Offices in Texas and Florida.
