

The Town of Greenburgh, New York's Police Department Selects Geographic Technologies Group (GTG) to Implement New GIS Software Solutions

Goldsboro, NC – Geographic Technologies Group, Inc. (GTG) announced today that **the Town of Greenburgh, New York's Police Department** has procured additional product functionality from GTG's LG GIS software suite. The Department will be implementing additional licenses of LGmobile software to expand the Department's existing LG platform which already includes other GIS applications such as LGdispatch.

LGmobile is the latest breakthrough in mobile software solutions. LGmobile is a field-based mobile GIS mapping software solution used in public safety vehicles. It has a simple, easy-to-use interface that allows users to access important and vital dispatch and GIS information. Active incidents, AVL units and specific user events are all readily available within LGmobile.

Curtis Hinton, CEO and Co-owner of GTG, stated that, "GTG has enjoyed working with Greenburgh over the past few years. They face the challenges that all public safety agencies nationwide face – delivery quick, consistent, and quality services for the protection of their citizenry. Greenburgh understands that software tools can help them better their service delivery. Greenburgh's use of the LG suite has improved information sharing and service delivery. The next logical move for the Town was to extend these powerful tools to the field with LGmobile."

The Department's continuing utilization of GTG's LG products highlights the value of our products as an integrated and comprehensive set of GIS solutions that leverage the Department's investment in their current applications. As with other fast-growing communities, the Town of Greenburgh's Police Department has embraced cutting-edge technology to improve public safety services for its citizens.

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions.
