The City of Greenville, North Carolina Selects Geographic Technologies Group (GTG) to Extend Their Crime Analysis Capabilities

Goldsboro, NC – Geographic Technologies Group, Inc. (GTG) announced today that the **City of Greenville, North Carolina** has procured additional products from GTG's LG GIS software suite. The City will be implementing additional licenses of LGcrimes software to expand the City's existing LG platform which includes other GIS applications.

LGcrimes is an affordable and easy-to-use crime reporting, mapping and analysis software application designed for towns, cities, and counties of all sizes and complexities. LGcrimes aids in the visualization and analysis of police incident information. The spatial distribution of crimes will allow law enforcement professionals to maximize the use of departmental assets to satisfy the ever-growing demand for critical services. Public Safety departments with limited budgets and staff can now take advantage of crime analysis technology while leveraging their organization's investment in GIS technology.

Curtis Hinton, CEO and Co-owner of GTG, stated that, "GTG has been working with Greenville for the past decade. We have witnessed their growth from no GIS to an enterprise-wide GIS adoption. The continued use of GIS tools to assist at the departmental level is a natural progression that dovetails with the GIS Implementation plan that the City adopted a few years ago. We at GTG will continue to work hand-in-hand with Greenville staff to insure that their GIS remains a showcase and is highly successful."

The City's continued utilization of GTG's LG products highlights the value of our products as an integrated and comprehensive set of GIS solutions that leverage the City's investment in their current applications. As with other fast-growing communities, the City of Greenville has embraced cutting-edge technology to improve public safety services for its citizens.

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains six offices located across the United States: Headquarters in North Carolina, and Regional Offices in Florida, Illinois, Oregon, Pennsylvania and Texas.
