Hanover County, Virginia Selects Geographic Technologies Group (GTG) to Implement GIS Software Solutions

Longview, TX – Geographic Technologies Group, Inc. (GTG) announced today that Hanover County, Virginia purchased seven (7) additional seats of LGviewer.

LGviewer provides a set of GIS tools in a simple easy-to-use desktop application. LGviewer allows for visualization of land management information. Local government professionals have long desired the ability to map and analyze the spatial distribution of all data that is tracked within their enterprise IT systems. LGviewer is designed to GIS enable corporate databases in tandem with existing GIS data to provide a powerful set of tools for visualization and analysis.

James Kelt, Regional Manager for GTG, stated, "LGviewer is specifically designed to take GIS to every department with customizable queries, reports, print templates and much more. One of the most powerful aspects of the applications is the ability to extract information from various land management databases to plot locations for utility meters, work orders, code enforcement violations, occupational licenses, accounts receivable, building permits and more. As these data layers become available in LGviewer, users immediately appreciate the power of using a GIS application when conducting daily operations. Hanover County has taken the next step in providing some of the most powerful GIS applications available in local government to every county department."

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains four offices located across the United States: Headquarters in North Carolina, and Regional Offices in Texas, Florida, and Missouri.
