Henry County, Ga. Implements GTG's MapNimbus, Keeps Citizens Informed

GOLDSBORO, N.C. – Geographic Technologies Group (GTG) announces that Henry County, Ga. has recently implemented GTG's MapNimbus application, an easy-to-use online public Web portal that provides citizens with information on what is happening in their neighborhood.

MapNimbus provides more information in more categories than other public Web portals. MapNimbus is a user-friendly, easy-to-use Google Maps-based interface that allows the public to view information in a variety of categories, including crime activity and sex offender data. It offers users a wide variety of functionality including built-in search, statistics, reporting, and e-mail notification capabilities. MapNimbus is free to the public.

"GTG is excited about Henry County's recent adoption of MapNimbus," said Curt Hinton, CEO of GTG. "MapNimbus is proving to be a must-have for local government organizations. It is the easiest way to keep citizens involved and informed about what is happening in their neighborhoods."

MapNimbus will provide a noticeable return-on-investment at Henry County, saving time and valuable resources for both citizens and County personnel.

For more information on how MapNimbus can benefit your community, visit www.geotg.com/mapnimbus.html or call 888-757-4222.

About Geographic Technologies Group, Inc.:

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies.
