The City of Homestead, Florida Selects Geographic Technologies Group (GTG) to Implement New GIS Software Solutions

Goldsboro, NC – Geographic Technologies Group, Inc. (GTG) announced today that the City of Homestead, Florida has procured new products from GTG's LG GIS software suite. The City will be implementing licenses of LGaddress for Public Safety.

LGaddress for Public Safety is a Bi-directional Geographic Information System (GIS) software application that allows spatial management of the City of Homestead's E-911 Geofile. LGaddress for Public Safety allows the user to update Geofile records with spatial information residing in a GIS. Spatial overlay capabilities allow the user a window into GIS and Geofile records.

Curtis Hinton, CEO and Co-owner of GTG, stated, "Homestead has consistently put a high priority on public safety. Staff understand that GIS tools for public safety require accurate data. LGaddress for Public Safety will allow staff to maintain a highly accurate street centerline and address point layer that will in turn allow normalization of the public safety address tables. These tools will allow staff to do their job much more efficiently and with a great degree of accuracy."

The City's utilization of GTG's LG products highlights the value of our products as an integrated and comprehensive set of GIS solutions that leverage the City's investment in their current applications. As with other fast-growing communities, the City of Homestead has embraced cutting-edge technology to improve public safety services for its citizens.

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains six offices located across the United States: Headquarters in North Carolina, and Regional Offices in Florida, Illinois, Oregon, Pennsylvania and Texas.
