The City of Hoover, Alabama Selects GTG to Develop GIS Strategic Implementation Plan

GOLDSBORO, N.C. – The City of Hoover, Alabama, selected Geographic Technologies Group, Inc. (GTG) to develop a multi-year, phased GIS Strategic Implementation Plan. The plan will evaluate current GIS operations in the City and make recommendations that will ensure an enterprise-wide GIS.

The project will include on-site interviews and presentations to all of the stakeholders. The resultant plan will serve as the step-by-step guide of how GIS is governed, implemented, and distributed throughout the City.

The largest suburb of Birmingham, Hoover is located along the rolling foothills of the Appalachian Mountains. It is part of the Birmingham-Hoover metropolitan statistical area.

“We are very excited to work with the City of Hoover,” said Curt Hinton, CEO of GTG. “Staff are eager to move GIS to an enterprise-wide level while leveraging their existing information technology investments. Our team will be focusing on how GIS will allow the City to realize on its investment in GIS.”

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains three offices located across the United States: Headquarters in North Carolina, and Regional Offices in Texas and Florida.
