The City of Jackson, Tennessee Selects GTG to Implement GIS Software Solutions

GOLDSBORO, N.C. – Geographic Technologies Group, Inc. (GTG) announces that the City of Jackson, Tennessee has procured GIS software from GTG. The City is upgrading 100 seats of LGmobile to LGmobile Community Connect.

LGmobile Community Connect is a GIS software solution that allows LG users to integrate AVL with the LGmobile software. LGmobile allows officers in the field to view critical GIS and 911 call data. The software allows GPS enabled vehicles to be tracked via the GIS interface. It takes GPS data from vehicles and places a moving map symbol on the GIS map interface that corresponds to the vehicles location in the real world. Historical AVL information is maintained with the product.

“Our clients are really embracing the benefits of Mobile and AVL technology,” said David Holdstock, President of GTG. “The City of Jackson is using this state-of-the-art technology to better serve their community.”

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains three offices located across the United States: Headquarters in North Carolina, and Regional Offices in Texas and Florida.
