

The City of Jacksonville, North Carolina Selects Geographic Technologies Group (GTG) to Implement New GIS Software Solutions

Goldsboro, NC – Geographic Technologies Group, Inc. (GTG) announced today that the **City of Jacksonville, North Carolina** has procured additional products from GTG's LG GIS software suite. The City will be implementing additional licenses of LGviewer software to expand the City's existing LG platform which already includes other GIS applications such as LGaddress and LGweb.

LGviewer is a visualization and analysis tool that allows a user to drill down into GIS data layers and disparate corporate databases.

Curtis Hinton, CEO and Co-owner of GTG, stated that; "Jacksonville understands that the true power of GIS is its ability to unify the IT investments within an organization. The LG products add a tremendous amount of value to the storehouse of existing data residing at the City. What once went into a database never to be seen again is now utilized on a daily basis for decision making and analysis. We are excited to continue our long-standing relationship with Jacksonville."

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.
