

The City of Jacksonville, North Carolina's Police Department Selects Geographic Technologies Group (GTG) to Implement New GIS Software Solutions

Goldsboro, NC – Geographic Technologies Group, Inc. (GTG) announced today that the **City of Jacksonville, North Carolina's Police Department** has procured additional products from GTG's LG GIS software suite. The Department will be implementing licenses of LGdispatch and additional licenses of LGcrimes software to expand the Department's existing LG platform which already includes other GIS applications such as LGfires.

LGdispatch is a Computer Aided Dispatch (CAD) mapping interface that provides E-911 dispatchers with an interactive map displaying the location of all emergency calls. LGdispatch offers advanced geo-coding capabilities. Addresses can be validated against address points, polygons (tax parcels) and lines (road network).

LGcrimes is an affordable and easy-to-use crime reporting, mapping and analysis software application designed for towns, cities and counties of all sizes and complexities. LGcrimes aids in the visualization and analysis of police incident information. The spatial distribution of crimes will allow law enforcement professionals to maximize the use of departmental assets to satisfy the ever-growing demand for critical services. Public Safety departments with limited budgets and staff can now take advantage of crime analysis technology while leveraging their organization's investment in GIS technology.

The Department's continued utilization of GTG's LG products highlights the value of our products as an integrated and comprehensive set of GIS solutions that leverage the Department's investment in their current applications. As with other fast-growing communities, the City of Jacksonville's Police Department has embraced cutting-edge technology to improve public safety services for its citizens.

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.
