## **The City of Jacksonville, North Carolina Selects GTG to Implement GIS Software Solutions**

**GOLDSBORO, N.C.** – Geographic Technologies Group, Inc. (GTG) announces that the City of Jacksonville, North Carolina has procured GIS software from GTG. The City has purchased the upgrade of nine seats of LG GeoBlade Dispatch and 25 seats of LG GeoBlade Crimes.

LG GeoBlade Dispatch is highly customizable and allows dispatchers to enter special events to display on the screen. The application has the ability to perform historic call mapping, historic AVL mapping, and E-911 call mapping. GeoBlade Dispatch is AVL enabled and Phase II compliant.

LG GeoBlade Crimes is designed to give Police and Sheriff Departments the ability to make intelligent decisions that will help make their city or county a safer place to live. It also gives public safety users the ability to create pin maps for incidents, accidents, arrests, citations, and sexual predators in a seamless GIS interface that directly connects to an organization's Crime Record Management databases. This application gives users the ability to run geographic analysis for crime trends, generate high quality incident reports, and print maps with crime data.

“ GTG has had a very successful relationship with Jacksonville. Jacksonville staff understand the need for GIS tools that allow their end users to do their jobs more effectively. Jacksonville has embraced a full suite of GIS software and continue to ensure that the organization and the citizens receive the full benefit from their IT investments,” said Curt Hinton, CEO of GTG.

### **About Geographic Technologies Group, Inc. (GTG):**

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains three offices located across the United States: Headquarters in North Carolina, and Regional Offices in Texas and Florida.
