## **The City of Jacksonville, North Carolina Selects Geographic Technologies Group (GTG) to Implement GIS Software Solutions**

**Longview, TX** – Geographic Technologies Group, Inc. (GTG) announced today that the **City of Jacksonville, North Carolina** procured software and services from GTG. The City purchased an additional seat of LGdispatch with LGcommunity Connect.

LGdispatch with Community Connect is a GIS software solution that allows both HTE Public Safety Computer Aided Dispatch users to integrate AVL (Automatic Vehicle Locations) with LG mapping software. The software allows GPS enabled vehicles, incoming 911 calls, and Phase II calls to be tracked via the GIS interface. It takes GPS data from vehicles and places a moving map symbol on the GIS map interface that corresponds to the vehicles location in the real world. Historical AVL and CAD information is maintained with the product.

James Kelt, Regional Manager for GTG, stated, “Jacksonville, NC will be implementing LGdispatch with Community Connect making the community a safer place to live. By incorporating mapping software for dispatching Fire, Police and EMS services with an AVL feed, officials and dispatchers will be able to reduce response times, locate calls for service, and help first responders arrive on scene faster; this will ultimately save time, money and lives. In the realm of emergency services, information is power and LGdispatch with LGcommunity Connect is the most efficient way of incorporating the latest technology of GIS, GPS, CAD, and Phase II data to public safety users. By incorporating GIS and HTE’s CAD products with LGdispatch and Community Connect, Jacksonville, North Carolina has taken the next step for overall public and officer safety.”

### ***About Geographic Technologies Group, Inc. (GTG):***

*GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.*

*GTG has over 700 clients located throughout North America and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains six offices located across the United States: Headquarters in North Carolina, and Regional Offices in Texas, Florida, Illinois, Missouri, and Pennsylvania.*

*Additional information may be obtained by contacting Geographic Technologies Group, Inc. at 888.757.4222 or you can access our website at [www.geotg.com](http://www.geotg.com).*
