Geographic Technologies Group Welcomes Training Center Manager, Joe Renzetti

GOLDSBORO, N.C. – Geographic Technologies Group, Inc. (GTG) announces the recent addition of Joe Renzetti, Training Center Manager, to their North Carolina corporate office.

A graduate of Northern Illinois University, Joe interned with the Northeastern Illinois Planning Commission until he received a position with the City of Naperville, Illinois. There he gained experience as a GIS Specialist and GIS Coordinator. Joe worked closely with the Naperville Police Department and gained experience using GTG's Public Safety software.

"My experience of serving the community in Naperville gave me a better understanding of more ways to become involved in GIS," said Joe. "I was attracted to the Training Center Manager position because I have a desire to serve local governments, and it would allow me to expand my talent in teaching GIS."

As Training Center Manager, Joe is responsible for the development of courses and training at GTG. He will also assist in project management, as well as support with ArcGIS Server installs.

"Our new training center provides excellent educational opportunities for GIS professionals," said Curt Hinton, CEO of GTG. "I have complete confidence that Joe will provide outstanding training to all who attend our training center. We are very excited for the future possibilities with Joe as a part of the GTG team."

Training courses offered at GTG include Introduction to ArcGIS I and II, department specific courses (GIS for Planning, GIS for Crime Analysis, GIS for Hazard Mitigation, etc.) and the popular GIS Manager's Workshop that is now being offered nationwide.

For more information on training opportunities with GTG, visit www.geotg.com/gis or email training@geotg.com.

About Geographic Technologies Group, Inc.:

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG

maintains four offices located across the United States: Headquarters in North Carolina, and Regional Offices in Texas, Missouri, and Florida.
