## **The City of Kearney, Nebraska Selects Geographic Technologies Group (GTG) to Implement GIS Software Solutions**

**Longview, TX** – Geographic Technologies Group, Inc. (GTG) announced today that the **City of Kearney, Nebraska** has procured software and services from GTG. The City of Kearney had previously chosen GTG to implement LGdispatch to integrate open databases with GIS, thereby providing an integrated platform that will enable City personnel to leverage existing public safety based data and applications. The City has recently chosen to upgrade its existing LGdispatch software to LGcommunity connect.

LGcommunity connect is a GIS software solution that allows both HTE Land and Public Safety users to integrate AVL with LG software. The software allows GPS enabled vehicles to be tracked via the GIS interface. It takes GPS data from vehicles and places a moving map symbol on the GIS map interface that corresponds to the vehicles location in the real world. Historical AVL information is maintained with the product.

James Kelt, Regional Manager for GTG said, "The City of Kearney is now on the cutting edge of mapping technology by incorporating AVL locations of all of their first response vehicles to their existing LGdispatch solution. When responding to a 911 call for service time is critical, LGdispatch with LGcommunity connect gives dispatchers the ability quickly identify the closest unit to a call and dispatch the appropriate officer to the scene. Furthermore, LGcommunity connect serves as a tool to help ensure officer safety; if an officer needs immediate assistance, dispatchers will know exactly where the officer is located without having to communicate over the radio."

### **About Geographic Technologies Group, Inc. (GTG):**

*GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.*

*GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains four offices located across the United States: Headquarters in North Carolina, and Regional Offices in Florida, Missouri and Texas.*

Additional information may be obtained by contacting Geographic Technologies Group, Inc. at 888-757-4222 or you can access our website at [www.geotg.com](http://www.geotg.com).
