

## **The City of Kissimmee, Florida Selects Geographic Technologies Group (GTG) to Implement GIS Software Solutions**

**Goldsboro, NC** – Geographic Technologies Group, Inc. (GTG) announced today that the **City of Kissimmee, Florida** has procured software and services from GTG. The City purchased an upgrade of LGmobile and LGdispatch to LGcommunity connect.

LGcommunity connect is a GIS software solution that allows both HTE Land and Public Safety users to integrate AVL with LG software. The software allows GPS enabled vehicles to be tracked via the GIS interface. It takes GPS data from vehicles and places a moving map symbol on the GIS map interface that corresponds to the vehicles location in the real world. Historical AVL information is maintained with the product.

Curtis Hinton, CEO and Co-owner of GTG, stated, “With great recreational options (SeaWorld), Kissimmee is a place that most of us are familiar with and have visited. GTG has been a partner with Kissimmee for many years. We have worked with them on GIS planning and software solutions for close to a decade. The acquisition of AVL is going to further the progressive vision of the IT and GIS staff at the City. Public Safety staff will be able to view vehicle locations and be able to quickly make decisions about personnel deployment in an emergency. We look forward to working with Kissimmee on this exciting project and insuring that the City continues to have one of the best GIS implementations in the nation.”

### **About Geographic Technologies Group, Inc. (GTG):**

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains six offices located across the United States: Headquarters in North Carolina, and Regional Offices in Florida, Illinois, Oregon, Pennsylvania and Texas.
