The City of Laramie, Wyo. Selects GTG to Upgrade Public Safety GIS Software Solutions

GOLDSBORO, N.C. – Geographic Technologies Group, Inc. (GTG) announces that the City of Laramie, Wyoming has upgraded to LG GeoBlade Dispatch and LG GeoBlade Crimes. This upgrade will allow the city’s public safety personnel to better protect their community.

LG GeoBlade Dispatch is highly customizable and allows dispatchers to enter special events to display on the screen. The application has the ability to perform historic call mapping, historic AVL mapping, and E-911 call mapping. LG GeoBlade Dispatch is AVL enabled and Phase II compliant.

LG GeoBlade Crimes is designed to give Police and Sheriff Departments the ability to make intelligent decisions that will help make their community a safer place to live. It also gives public safety users the ability to create pin maps for incidents, accidents, arrests, citations, and sexual predators in a seamless GIS interface that directly connects to an organization’s Crime Record Management databases. This application gives users the ability to run geographic analysis for crime trends, generate high quality incident reports, and print maps with crime data.

“We are very excited to continue our longstanding relationship with Laramie,” said Curt Hinton, CEO of GTG. “Laramie staff understand the importance of utilizing GIS to better protect the community. This upgrade utilizes ArcGIS Server and positions Laramie to continue its successful usage of the best of breed public safety tools.”

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has more than 700 clients located throughout North America and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains four offices located across the United States: Headquarters in North Carolina, and Regional Offices in Texas and Florida.
