The City of McKinney, Texas Selects Geographic Technologies Group (GTG) to Implement GIS Software Solutions

Longview, TX – Geographic Technologies Group, Inc. (GTG) announced today that the **City of McKinney, Texas** has procured GIS software solutions from GTG's LG GIS software suite. The City will be implementing LGviewer Work Request Module. This application will serve to expand the City's existing GTG software platform.

LG Viewer Work Request Module enables users to generate and query work requests as well as view job orders directly from a GIS interface. Users can also place and locate work orders/task orders through a GIS interface.

James Kelt, GTG's Regional Manager and director of GTG's Texas office says, "Local government is steadily moving towards the ability to generate work orders from a GIS interface. LGviewer in conjunction with the Work Order module allows LG users to do just that. The City of McKinney is on the cutting edge on utilizing GIS as the first place to enter in work orders into their work order management system. The ability to click on a location and populate all of the data necessary to have a work order crew get the job done is invaluable in efficiency and productivity for local government."

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains six offices located across the United States: Headquarters in North Carolina, and Regional Offices in Florida, Illinois, Oregon, Pennsylvania and Texas.
