## **The Village of Oak Lawn, Illinois Selects Geographic Technologies Group (GTG) to Implement GIS Software Solutions**

**Longview, TX** – Geographic Technologies Group, Inc. (GTG) announced today that the **Village of Oak Lawn, Illinois** procured software and services from GTG. The County purchased LGdispatch with LGcommunity Connect.

LGdispatch with community connect is a GIS software solution that allows both HTE Public Safety Computer Aided Dispatch users to integrate AVL (Automatic Vehicle Locations) with LG mapping software. The software allows GPS enabled vehicles, incoming 911 calls, and Phase II calls to be tracked via the GIS interface. It takes GPS data from vehicles and places a moving map symbol on the GIS map interface that corresponds to the vehicles location in the real world. Historical AVL and CAD information is maintained with the product.

James Kelt, Regional Manager for GTG, stated, "The Village of Oak Lawn has taken a significant step in making their town a safer place to live and work. LGdispatch with community connect will give first responders and dispatcher the tools needed to help save time, money, and lives. The LG GIS and GPS technology is an important part in making sure that a call for services is properly mapped and that the correct unit is dispatched to that call. By merging the mapping and CAD technology, the dispatchers can now visualize these data in a geographic perspective."

### **About Geographic Technologies Group, Inc. (GTG):**

*GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.*

*GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains six offices located across the United States: Headquarters in North Carolina, and Regional Offices in Florida, Illinois, Missouri, Pennsylvania and Texas.*
