

Okaloosa County, Florida Water and Sewer Selects Geographic Technologies Group (GTG) to Implement New GIS Software Solutions

Goldsboro, NC – Geographic Technologies Group, Inc. (GTG) announced today that **Okaloosa County, Florida Water and Sewer** has procured software and services from GTG. Okaloosa County procured GTG's LGweb and LGaddress.

LGweb is an Intranet GIS data browser that seamlessly integrates with Okaloosa County's GIS and existing IT investment. Employees from managers to field crew will be able to visualize GIS data in conjunction with billing, consumption, work orders, and other data residing in Okaloosa County's corporate databases.

In conjunction with the Intranet tool, Okaloosa County has acquired LGaddress. LGaddress allows users to maintain address points, centerlines, and/or meter information. This tool then maintains a one-to-one relationship between that customer geography and the current in-house records such as billing, work orders, and consumption.

Curtis Hinton, CEO and Co-owner of GTG, stated that, "we are very excited about working with Okaloosa Water and Sewer. They have been very meticulous in making sure that this was the best solution for their needs. They understand that the LG solutions will bring them the best of the GIS and corporate database worlds."

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface.
