

The Town of Palm Bay, Florida Selects Geographic Technologies Group (GTG) to Implement GIS Software Solutions

Goldsboro, NC - Geographic Technologies Group, Inc. (GTG) announced today that the **Town of Palm Bay, Florida** has procured LGaddress from GTG's LG GIS software suite. This application will serve to expand the City's existing GTG software platform, which already includes LGdispatch, LGcrimes, LGviewer, LGweb, LGpublicweb and LGaddress for Public Safety.

LGaddress allows users to maintain address points, pass valuable GIS data to their land database, and ensures a 100% match rate of the land database modules via an intuitive ArcEngine based GIS application.

Curtis Hinton, CEO and Co-owner of GTG, stated that, "the Town of Palm Bay has embraced the concept of full integration of IT and GIS. They have focused on not having independent silos of GIS data that have little interaction with silos of corporate IT housed data. They are using LG products as the technological window into and a way to manage their IT investments. Gone are the days of having to look up customer data on one system, view work orders on another, and then access GIS data on yet another system. This is all now one fully integrated system at Palm Bay."

The Town's utilization of GTG's LG products highlights the value of our products as an integrated and comprehensive set of GIS solutions that leverage the Town's investment in their current applications. As with other fast-growing communities, the Town of Palm Bay has embraced cutting-edge technology to improve services for its citizens.

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America, Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains six offices located across the United States: Headquarters in North Carolina, and Regional Offices in Texas, Florida, Illinois, Oregon, and Pennsylvania.
