The City of Plano, Texas Selects Geographic Technologies Group (GTG) to Implement GIS Software Solutions

Longview, TX – Geographic Technologies Group, Inc. (GTG) announced today that **the City of Plano, Texas** has procured products from GTG's LookingGlass GIS software suite. The City will be implementing licenses of LGaddress Manager- Land. LGaddress allows users to maintain address points via an intuitive ArcEngine based GIS application. By maintaining the HTE address master file in a GIS interface, the City has the ability to map every HTE land module record, this in turn gives the Looking Glass Viewer users 100% confidence in the queries and searches against the database. Furthermore, LGaddress allows the GIS data attributes to be passed to the HTE database. The mass overlay functionality in LGaddress will pass attributes of a GIS layer to every record within that layer thus saving hours of manual entry by City staff.

James Kelt, Regional Manager for GTG, said that "The City of Plano will now be able to map all critical land management locations such as building permits, meters, code enforcement violations, accounts receivable, work orders, and occupational licenses with 100% accuracy. By mapping this information, City departments can now allocate resources in a much more efficient manner to serve the public better. LGAddress also provides the City a seamless tool to mass overlay data from their GIS into the land management database. The functionality that LGaddress provides will save the City of Plano hundreds of work hours by integrating their GIS with the land management applications."

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains six offices located across the United States: Headquarters in North Carolina, and Regional Offices in Florida, Illinois, Oregon, Missouri, and Texas.
