## The City of Portland, Maine Selects Geographic Technologies Group (GTG) to Implement GIS Software Solutions

**Longview, TX** – Geographic Technologies Group, Inc. (GTG) announced today that the **City of Portland, Maine** has procured products from GTG's LG GIS software suite. The City will be implementing LGfires, as well as adding additional licenses of LGdispatch Community Connect and LGcrimes, to better serve the City.

LGfires is a simple, easy-to-use GIS software product seamlessly integrated into Portland's existing fire incident data. It offers the fire departments refined spatial tools required in today's high-tech world. LGfires allows an end-user to generate plumes to predict hazardous material impact areas. The user can pick from a variety of atmospheric conditions, wind direction/speed and emission rates to create a hazard zone.

LGcommunity connect is a GIS software solution that allows both HTE Land and Public Safety users to integrate AVL with LG software. The software allows GPS enabled vehicles to be tracked via the GIS interface. It takes GPS data from vehicles and places a moving map symbol on the GIS map interface that corresponds to the vehicle's location in the real world. Historical AVL information is maintained with the product.

James Kelt, Regional Manager for GTG, stated, "Portland, ME has been in the forefront of GIS initiatives for public safety mapping for some time now. The LG product line has taken this initiative to the next level by spatially enabling the City's public safety databases. With the LG products, the City can now map, query, run reports and analyze their Computer Aided Dispatch, Crimes and Fires databases. LGdispatch, LGcrimes and LGmobile have proven themselves to help local government make the community safer for the public and first responders."

### **About Geographic Technologies Group, Inc. (GTG):**

*GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.*

*GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains four offices located across the United States: Headquarters in North Carolina, and Regional Offices in Texas, Florida, and Missouri.*

*Additional information may be obtained by contacting Geographic Technologies Group, Inc. at 888-757-4222 or you can access our Website at [www.geotg.com](http://www.geotg.com).*
