

## **Saint Vincent's Electric Services (VINLEC) Selects Geographic Technologies Group (GTG) to Implement GIS Software Solutions**

**Goldsboro, NC** – Geographic Technologies Group, Inc. (GTG) announced today that Saint Vincent's Electric Services has procured software and services from GTG. Vinlec procured GTG's LGweb and LGaddress.

LGweb is an Intranet GIS data browser that seamlessly integrates with Vinlec's GIS and existing IT investment. Employees from managers to field crew will be able to visualize GIS data in conjunction with billing, consumption, work order, and other data residing in Vinlec's corporate databases.

In conjunction with the Intranet tool, Vinlec has acquired LGaddress. LGaddress allows users to maintain address points, centerlines, and/or meter information. This tool then maintains a one-to-one relationship between that customer geography and the current in-house records such as billing, work orders, and consumption.

Curtis Hinton, CEO and Co-owner of GTG, stated that "LGaddress utilized in conjunction with LGweb is a rich and powerful toolset. Vinlec will now be able to integrate two disparate systems. One of which contains GIS data about customer locations and electric infrastructure. The other, contains valuable customer and utility data. Having these two systems work together instead of separately will allow Vinlec to make more informed decisions. Undoubtedly Vinlec staff will be able to identify lost revenue, optimize electric service, and work more efficiently by optimizing field crews and work orders. Other utilities that have implemented these tool sets have found them to be invaluable. GTG is very excited to continue its longstanding relationship with Vinlec. Saint Vincent and the Grenadines are some of the most beautiful vistas on the planet. Vinlec staff are dedicated to making sure that they deliver the most reliable and quality service possible."

### **About Geographic Technologies Group, Inc. (GTG):**

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains six offices located across the United States: Headquarters in North Carolina, and Regional Offices in Florida, Illinois, Oregon, Pennsylvania and Texas.
