The City of San Jacinto, California Selects Geographic Technologies Group (GTG) to Implement New GIS Software Solution

Longview, TX – Geographic Technologies Group, Inc. (GTG) announced today that the **City of San Jacinto, California** has procured LGviewer from GTG's LG GIS software suite.

LGviewer provides a set of GIS tools in a simple to use desktop application. LGviewer allows for visualization of land management information. Local government professionals have long desired the ability to map and analyze the spatial distribution of all data that is tracked within their data storage. The land management module allows users to assign locations to each land management record. The LGviewer software is designed to leverage database data along with existing GIS data to provide a powerful set of tools for visualization and analysis.

James Kelt, Regional Manager for GTG, stated that, "By Spatially enabling the City of San Jacinto's land management database, LGviewer users will now be able to look at database records in a whole new way. Locations such as utility meters, building permits, occupational licenses, work orders, code enforcement violations and much more can now be leveraged in the City's GIS. This concept is a powerful and seamless way of making the City a more product and efficient agency severing the general public."

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains four offices located across the United States: Headquarters in North Carolina, and Regional Offices in Florida, Missouri, and Texas.
