The City of Springdale, Arkansas Selects Geographic Technologies Group (GTG) to Extend Their Crime Analysis Capabilities

Longview, TX – Geographic Technologies Group, Inc. (GTG) announced today that the **City of Springdale, Arkansas** has procured additional products from GTG's LG GIS software suite. The City will be implementing licenses of LGcrimes software to expand the Department's existing LG platform. The City also purchased LGdispatch Community Connect with AVL.

LGcrimes is an affordable and easy-to-use crime reporting, mapping, and analysis software application designed for towns, cities, and counties of all sizes and complexities. LGcrimes aids in the visualization and analysis of police incident information. The spatial distribution of crimes will allow law enforcement professionals to maximize the use of departmental assets to satisfy the ever-growing demand for critical services. Public Safety departments with limited budgets and staff can now take advantage of crime analysis technology while leveraging their organization's investment in GIS technology.

James Kelt, GTG's Regional Manager, stated that, "The City of Springdale, AR has taken the necessary steps to incorporate GIS into daily operations in the Police department. Computer Aided Dispatch and Crime analysis mapping are now available with LGdispatch and LGcrimes for dispatchers and officers to help make the City a safer place to live. The City has invested a lot of money in GIS and public safety databases, LGdispatch and LGcrimes will merge the two technologies together in a powerful and robust set of mapping applications. End-users can be trained in using these applications in a two-hour training class and will be able to leverage the software right out of the box."

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains four offices located across the United States: Headquarters in North Carolina, and Regional Offices in Florida, Missouri, and Texas.
