City of Tyler, Texas Selects Geographic Technologies Group (GTG) to Implement GIS Software Solutions

Longview, TX– Geographic Technologies Group, Inc. (GTG) announced today that the **City of Tyler, Texas** has procured software and services from GTG. The City purchased 25 additional licenses of LGmobile with LGcommunity connect.

LGmobile with community connect is a GIS software solution that allows both HTE Land and Public Safety users to integrate AVL with LG software. The software allows GPS enabled vehicles to be tracked via the GIS interface. It takes GPS data from vehicles and places a moving map symbol on the GIS map interface that corresponds to the vehicles location in the real world. Historical AVL information is maintained with the product.

James Kelt, Regional Manager for GTG said, "The City of Tyler police department originally deployed 60 LGmobile seats with Community Connect in 2006. Since then, the product has gained rave reviews from officers and police officials. Due to the applications functionality and ease of use, the department decided to add 25 additional seats for a deeper penetration of GIS mapping for public safety. Ultimately the tool will help officers reduce response times to 911 calls for service and make Tyler a safer place to live. LGmobile with LGcommunity connect takes GIS, Computer Aided Dispatch locations, user defined events, and digitally linked files such as floor plans, building walk through movies, hazardous materials lists, pre-fire plans, and other information into field. These data are crucial in making informed and intelligent, split second decisions when seconds count"

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geo-technologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has over 700 clients located throughout North America, the Caribbean, and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains six offices located across the United States: Headquarters in North Carolina, and Regional Offices in Florida, Illinois, Missouri, Pennsylvania and Texas.
